TeleXchange Features In Detail

Call Flow Editor	With TeleXchange's web interface you can build your own call flows. Create highly sophisticated dial plans with interactive voice response. If, Switch and Goto modules allow the caller to interact with your phone system via their phones keypad. Simply record your announcements with your phone. Templates included or build from scratch.
VOIP Ready	TeleXchange can speak SIP to hardware and software VOIP phones, VOIP providers and gateways.
Supports Analogue, ISDN and VOIP	Connect an analog fax, a DECT phone or your ISDN provider line to TeleXchange. You only need the physical interfaces to plug these in. Talk to us for more information.
Number Of Parallel Calls	TeleXchange does not limit the number of parallel calls.
SIP Trunk Support	Multiple incoming VOIP numbers are organized in trunks.
VOIP Phone Support	All SIP compatible VOIP phones work with TeleXchange PBX.
Analogue Phone Support	You can use any analog phone with TeleXchange. This includes wireless DECT phones. If you like to use analog phones please make sure the hardware you are using has the appropriate number of ports to connect the phones to.
Video Phone Support	TeleXchange Exchanges support video phones.
Unlimited Extensions	Connect as many VoIP phones to TeleXchange as you want.
Phone Book	This is a system wide phone book every user has access to. All phones using auto-configuration receive this phone book automatically.
Speed Dial Call Screening	Configure the speed dial buttons of your phones from the TeleXchange interface.
Remote Phones	Those can be mobile phones or any external phone which are not physically or virtually connected to TeleXchange These phones receive an internal phone number (extension) and can hereafter be reached from any internal phone. External phones can also be used for call forwarding.
Night switch	Customers should hear a message or get forwarded to your mobile phone outside business hours? Use the automated or manual night switch, by either entering your business hours or just pushing a button on your phone when leaving the office.
Call Notifications To Email	Receive an email when you miss a call.
Voicemail System	Free voicemail system. Listen to voicemail or your phone or use voicemail to email. TeleXchange can deliver your voicemail to email as a .wav file playable with any Media Player. Forward calls to any internal or external phone including mobiles.
Multilanguage Voice Prompts	Hear system announcements in all your languages.
Call Groups	Organize phones in call groups to have them ring at the same time.
Custom Music On Hold	Upload your own music on hold in mp3 or .wav.
Call Queuing	Heavy traffic. Unlimited queuing for calls.
	The ability to screen your calls so only the relevant ones get in.
